EXHIBIT INDEX

99.1 Press release, dated January 18, 2000.

CONTINENTAL AIRLINES REPORTS
FOURTH QUARTER RESULTS AND
FIFTH STRAIGHT YEAR OF PROFITS

Moves up in the rankings of 100 Best Companies to Work for in America

HOUSTON, Jan. 18, 2000 -- Continental Airlines (NYSE: CAL and CAL.A) today reported fourth quarter net income of \$33 million (\$0.48 basic and \$0.47 diluted earnings per share), exclusive of previously announced gains and charges. This exceeds First Call's consensus estimate of \$0.39 diluted earnings per share.

The company reported its fifth straight year of profits, with annual net income of \$359 million (\$5.15 basic and \$4.89 diluted earnings per share), excluding special gains and charges.

Including special gains and charges, the company reported fourth quarter net income of \$167 million (\$2.46 basic and \$2.42 diluted earnings per share) and annual net income of \$455 million (\$6.54 basic and \$6.20 diluted earnings per share).

The company ended the year with its stock having appreciated 32.5 percent, highest of all the major U.S. airlines.

"In spite of high fuel prices and a tough revenue environment, we're the best positioned airline for the future," said Gordon Bethune, Continental Airlines' chairman and chief executive officer. "The market has recognized Continental's achievements and potential, as evidenced by our stock appreciation, which during 1999 and over the last five years has outperformed the industry."

Fourth Quarter Operating Results
(Exclusive of special gains and charges)

Fourth quarter passenger revenue rose 11.0 percent to \$2.0 billion. Traffic growth continued to outpace capacity increases, with a 13.3 percent increase in revenue passenger miles on a capacity increase of 10.5 percent. This resulted in a record load factor for the quarter of 71.3 percent.

Revenue per available seat mile (RASM) declined 1.0 percent for the quarter, driven by continued yield pressure in the transatlantic markets.

Domestic, Latin America and Micronesia operations recorded year-over-year increases in RASM. Detailed statistics by geographic region are shown below:

Fourth Quarter 1999 vs. Fourth Quarter 1998

	Passenger Revenue	RASM
Domestic	6.4%	1.2%
Transatlantic	22.4%	(14.1%)
Latin America	7.8%	6.8%
Micronesia	(8.3%)	20.7%
Transpacific	--- Not comparable ---	

Continental continued to enjoy domestic yield and length-of-haul adjusted RASM premiums to the industry. Five years ago, Continental lagged behind the industry average in both of these measures.

Over each of the last eleven quarters, Continental Express' traffic growth has exceeded capacity increases (on a quarter-

over-quarter basis) by a strong margin. In the fourth quarter, Continental Express' capacity increased 35.5 percent while traffic jumped 43.9 percent, resulting in a load factor increase of 3.7 percentage points.

As previously announced, Continental is early retiring six DC-10-30 aircraft (bringing to 13 the total DC-10-30 aircraft that will have been early retired by the end of this year), and replacing certain of those aircraft with narrowbody aircraft in select European markets which have been underperforming in the current revenue environment.

"We're pleased with the way our traffic growth exceeded our 1999 capacity additions," said Greg Brenneman, Continental's president and chief operating officer. "However, we have been unable to recover the dramatic increase in fuel prices in our revenues."

Surging fuel prices drove Continental's cost per available seat mile 3.2 percent higher in the fourth quarter as compared to the prior year. On a constant fuel price basis, the company was able to hold unit costs flat year-over-year, as newer, more fuel-efficient aircraft entered the fleet.

"If fuel costs for the fourth quarter of 1999 remained as they were in the fourth quarter of 1998, our pre-tax income would have exceeded last year's results," said Larry Kellner, Continental's executive vice president and chief financial officer. "However, if high fuel costs continue without an improvement in the revenue environment, the company may not post a profit in the first quarter of 2000, as we have in the past four years."

During the fourth quarter, Continental announced a joint marketing initiative with KLM Royal Dutch Airlines, moving one step closer to forming a global strategic alliance. The company also acquired a 28 percent stake in Gulfstream International Airlines, a privately held regional carrier serving Florida and the Caribbean.

Additionally, Continental launched non-stop service from Houston to Sao Paulo, Brazil, and Continental Express added service to Saltillo and Torreon, Mexico.

Continental also entered into an agreement with Northwest, Delta and United airlines to create an independently owned travel website. To date, 27 U.S. and foreign carriers, including American and US Airways, have signed up to join the web-based travel service.

Continental's own website continued to gain momentum, with online bookings increasing 174 percent year-over-year and e-ticket sales as a percent of total sales increasing to 47 percent during the fourth quarter.

Fourth Quarter Financial Accomplishments

During the fourth quarter, Continental continued its previously announced \$1.2 billion stock repurchase program. To date, the company has repurchased 18.7 million shares of Class B common stock for \$799 million.

In connection with its stock repurchase program, Continental has held preliminary discussions with Northwest Airlines concerning the acquisition by Continental of all the Class A stock of Continental currently held by Northwest. The alliance between Continental and Northwest is beneficial to both carriers, and any transaction would be designed to preserve and strengthen the benefits of the alliance. Continental desires to simplify its equity capital structure and is committed to continuing to repurchase outstanding equity. The company ended the year with cash and short-term investments of \$1.6 billion.

While posting its fifth straight year of profits, the company continued to receive top billing in customer satisfaction polls and achieved other significant milestones.

- For the second year in a row, Fortune Magazine ranked Continental among the 100 Best Companies to Work for in America, with the carrier moving up 17 positions on the list to No. 23 from No. 40. In addition, Continental was the largest employer of the top 42 corporations and was one of only two airlines to place on the list.
- In addition to being rated one of the most admired global airlines, Continental again won the J.D. Power award for customer satisfaction.
- During 1999, Continental took delivery of 58 new Boeing jets and currently flies the youngest jet fleet in the industry. The company retired 61 aircraft in 1999.
- A record 46 million passengers flew Continental last year, boosting the load factor to an all-time record high of 73.2 percent.
- E-ticket sales soared to new heights. For all of 1999, e-ticket sales accounted for 41 percent of total sales. Continental's website is rated No. 1 among airline websites in consumer polls, including the prestigious Forrester poll.
- The company continued to deliver on its promise to bring employees up to industry-standard wages. Additionally, the company paid employees \$26 million in on-time performance bonuses and gave away 16 new Ford Explorers for perfect attendance. On Feb. 14, the company will distribute approximately \$62 million (4.3 percent of eligible wages) in 1999 profit sharing to its employees.

Corporate Background

Continental Airlines is the fifth largest airline in the U.S., offering more than 2,200 departures daily to 136 domestic and 87 international destinations. Operating major hubs in New York, Houston and Cleveland, Continental (www.continental.com) has extensive service throughout the Americas, and to Europe and Asia.
