<sup>(</sup>a) Income tax benefit measured based on the effective cash tax rate. The effective cash tax rate is calculated by dividing cash taxes paid by pre-tax income excluding special charges and MTM gains on financial instruments. For the twelve months ended March 31, 2019, the effective cash tax rate was 0.4%.

<sup>(</sup>b) Non-interest bearing liabilities include advance ticket sales, frequent flyer deferred revenue, deferred income taxes and other non-interest bearing liabilities.

# UNITED CONTINENTAL HOLDINGS, INC. NON-GAAP FINANCIAL RECONCILIATION

(A) UAL evaluates its financial performance utilizing various accounting principles generally accepted in the United States of America (GAAP) and Non-GAAP financial measures, including adjusted operating income (loss), adjusted operating margin, adjusted pre-tax income (loss), adjusted pre-tax margin, adjusted net income (loss), adjusted diluted earnings (loss) per share and CASM, excluding special charges, third-party business expenses, fuel, and profit sharing, among others. UAL believes that adjusting for special charges is useful to investors because special charges are not indicative of UAL's ongoing performance. UAL believes that adjusting for MTM gains and losses on financial instruments is useful to investors because those unrealized gains or losses may not ultimately be realized on a cash basis. UAL believes that adjusting for interest expense related to finance leases of Embraer ERJ 145 aircraft is useful to investors because of the accelerated recognition of interest expense.

CASM is a common metric used in the airline industry to measure an airline's cost structure and efficiency. UAL reports CASM excluding special charges, third-party business expenses, fuel and profit sharing. UAL believes that adjusting for special charges is useful to investors because special charges are not indicative of UAL's ongoing performance. UAL also believes that excluding third-party business expenses, such as maintenance, ground handling and catering services for third parties and fuel sales, provides more meaningful disclosure because these expenses are not directly related to UAL's core business. UAL also believes that excluding fuel costs from certain measures is useful to investors because it provides an additional measure of management's performance excluding the effects of a significant cost item over which management has limited influence. UAL excludes profit sharing because this exclusion allows investors to better understand and analyze our operating cost performance and provides a more meaningful comparison of our core operating costs to the airline industry.

Reconciliations of reported non-GAAP financial measures to the most directly comparable GAAP financial measures are included below.

NON-GAAP FINANCIAL RECONCILIATION (Continued)

UAL believes that adjusting capital expenditures for assets acquired through the issuance of debt and finance leases is useful to investors in order to appropriately reflect the total amounts spent on capital expenditures. UAL also believes that adjusting net cash provided by operating activities for capital expenditures and adjusted capital expenditures is useful to allow investors to evaluate the company's ability to generate cash that is available for debt service or general corporate initiatives.

Impairment of assets: During the three months ended March 31, 2019, the company recorded an \$8 million fair value adjustment for aircraft purchased off lease. During the three months ended March 31, 2018, the company recorded a \$23 million fair value adjustment for aircraft purchased off lease and impairments related to certain fleet types and certain international slots no longer in use.

Severance and benefit costs: During the three months ended March 31, 2019 and 2018, the company recorded \$2 million and \$8 million, respectively, of severance and benefit costs primarily related to a voluntary early-out program for its technicians and related employees represented by the International Brotherhood of Teamsters. In the first quarter of 2017, approximately 1,000 technicians and related employees elected to voluntarily separate from the company and received a severance payment, with a maximum value of \$100,000 per participant, based on years of service, with retirement dates through early 2019. Also during the three months ended March 31, 2019 and 2018, the company recorded \$4 million and \$6 million, respectively, of management severance.

MTM gains on financial instruments: During the three months ended March 31, 2019 and 2018, the company recorded gains of \$14 million and \$45 million, respectively, for the change in market value of its investment in Azul Linhas Aéreas Brasileiras S.A. During the first quarter of 2019, the company recorded gains of \$3 million for the change in fair value of certain derivative assets related to equity of Avianca Holdings S.A. For equity investments and derivative assets subject to MTM accounting, the company records gains and losses as part of Nonoperating income (expense): Miscellaneous, net in its statements of consolidated operations.

#### (C) Interest expense related to finance leases of Embraer ERJ 145 aircraft

During the third quarter of 2018, United entered into an agreement with the lessor of 54 Embraer ERJ 145 aircraft to purchase those aircraft in 2019. The provisions of the new lease agreement resulted in a change in accounting classification of these new leases from operating leases to finance leases up until the purchase date. The company recognized \$21 million of additional interest expense in the three months ended March 31, 2019 as a result of this change.

#### (D) Effective tax rate

The company's effective tax rate for the three months ended March 31, 2019 and 2018 was 20.4% and 20.3%, respectively. The effective tax rate represents a blend of federal, state and foreign taxes and includes the impact of certain nondeductible items and the impact of a change in the company's mix of domestic and foreign earnings.
