Capacity: In the first quarter of 2017, year-over-year mainline completion factor of approximately 1.0 point higher resulted in consolidated capacity that was higher than the Company's original guidance range for the quarter.

Passenger Revenue: The Company now expects first-quarter 2017 consolidated passenger unit revenue to be approximately flat compared to the first quarter of 2016. Better than expected close-in traffic in March offset higher than anticipated completion factor in the quarter.

Non-Fuel Expense: First-quarter 2017 non-fuel expense is expected to include additional expense from the purchase of 12 previously leased 737NG aircraft and higher than expected employee incentive payments related to operation performance. These additional costs were partially offset by higher than anticipated capacity growth in the quarter.

Profit Sharing: Due to recently ratified labor agreements, the Company's profit sharing plans have changed for 2017. The Company now expects to pay:

- Approximately 7.6% of total adjusted earnings up to a 6.9% adjusted pre-tax margin
- Approximately 13.6% for any adjusted earnings above a 6.9% adjusted pre-tax margin
- Approximately 1.7% for any adjusted earnings above the prior year's adjusted pre-tax earnings

Adjusted earnings for the purposes of profit sharing are calculated as GAAP pre-tax earnings, excluding special items, profit sharing expense and share-based compensation program expense. These estimates are consistent with the Company's current labor agreements. The Company estimates that share-based compensation expense for the purposes of the profit sharing calculation will be approximately \$23 million in the first quarter of 2017.

Taxes: The Company expects a tax rate of approximately 34% for the first quarter of 2017. However, the Company expects that there will be no material cash taxes paid for the first quarter of 2017 due to United's net operating loss carryforwards (NOLs), which were approximately \$4.4 billion as of year-end 2016.

Gross Capital Expenditures: First-quarter gross capital expenditures are lower than the Company's original guidance range due to a change in timing of certain non-aircraft projects.

Revolving Credit Facility: In the first quarter of 2017, the Company increased its revolving credit facility by \$650 million to a total capacity of \$2.0 billion with the full amount currently undrawn.

GAAP to Non-GAAP Reconciliations

UAL is providing guidance utilizing various accounting principles generally accepted in the United States of America (“GAAP”) and Non-GAAP financial measures, including pre-tax margin, as adjusted and cost per available seat mile (“CASM”), as adjusted. CASM is a common metric used in the airline industry to measure an airline’s cost structure and efficiency. UAL reports CASM excluding profit sharing, third-party business expenses, fuel and special charges. Non-GAAP financial measures are presented because they provide management and investors the ability to measure and monitor UAL’s performance on a consistent basis.

Pursuant to SEC Regulation G, UAL has included the following reconciliation of reported Non-GAAP financial measures to comparable financial measures reported on a GAAP basis.

UAL believes excluding profit sharing allows investors to better understand and analyze our recurring cost performance and provides a more meaningful comparison of our core operating costs to the airline industry. UAL believes that adjusting for special charges is useful to investors because they are non-recurring charges not indicative of UAL’s ongoing performance. UAL also believes that excluding third-party business expenses, such as maintenance, ground handling and catering services for third parties, fuel sales and non-air mileage redemptions, provides more meaningful disclosure because these expenses are not directly related to UAL’s core business. UAL believes that excluding fuel costs from certain measures is useful to investors because it provides an additional measure of management’s performance excluding the effects of a significant cost item over which management has limited influence.

Consolidated Unit Cost (¢/ASM)	Estimated 1Q 2017	
Consolidated CASM Excluding Special Charges (a)	13.49	13.57
Less: Profit Sharing	0.02	0.05
Consolidated CASM Excluding Profit Sharing & Special Charges	13.47	13.52
Less: Third-Party Business Expenses	0.12	0.12
Consolidated CASM Excluding Profit Sharing, Third-Party Business Expenses & Special Charges	13.35	13.40
Less: Fuel Expense (b)	2.60	2.60
Consolidated CASM Excluding Profit Sharing, Third-Party Business Expenses, Fuel & Special Charges	10.75	10.80

(a) Excludes special charges, such as the impact of certain primarily non-cash impairment, severance and other similar accounting charges. While the Company anticipates that it will record such special charges throughout the year, at this time the Company is unable to provide an estimate of these charges with reasonable certainty.

(b) Both the cost and availability of fuel are subject to many economic and political factors and are therefore beyond the Company’s control.
